PROFESSIONAL SUMMARY

Aspiring Associate Product Manager with hands-on experience taking products from idea to launch. I founded a website-builder aggregator startup and built a full-stack SEO-driven web platform that generates **10-20+ organic leads per month** at zero infrastructure cost. I work across the product lifecycle: gathering requirements, writing PRDs, prioritizing features, testing releases, and analyzing funnel data using **SQL, Python, and Power BI**. I bring a mix of customer-facing experience, managing **204 applicants** with **37 conversions**, and technical depth in **Next.js, Supabase, and Django**, seeking an APM role to turn user problems into shipped features.

WORK EXPERIENCE

Marketing And Business Development Intern | Internship — Jan 2025 - Aug 2025
Vidyalaya Kunji — *Remote · Pune, Maharashtra*

- Managed communication with **204 prospective applicants**, converting **37 (18%)** into paid customers through consultative engagement and requirement gathering.
- Developed and maintained a **WordPress website**, improving content, navigation, and user experience for prospective students and parents.
- Built a college recommendation app, analyzing **5,000+ records** and achieving a **60% recommendation success rate**, eliminating the need for **2 manual job roles**.
- Automated personalized university brochure and PDF generation, reducing preparation time to **under 10 minutes** per brochure.
- Managed **$435 Meta Ads campaigns**, increasing engagement by **40%** and leads by **38%**, while optimizing budgets to improve estimated ROI by **40%**.

Technologies / Skills Used : *Business Analysis, Client Communication, Python, MongoDB, Meta Ads, Campaign Analytics, Django*

Founder and CEO | Self-employed — Mar 2024 - Nov 2024
Mivyapar — *Hybrid · Pune, Maharashtra*

- Conceived and built **MiVyapar**, a website-builder aggregator that allows users to generate and compare designs across **Wix, Hostinger, and Shopify** from a single prompt.
- Owned the product end to end: problem discovery, scoping, builder selection, development, SEO, and post-launch support.
- Delivered **3 client projects** with budgets ranging from **$150 to $530**, managing requirements, timelines, and stakeholder expectations.
- Led a **7-member cross-functional team** (design, development, content) across concurrent projects, ensuring quality and deadlines were met.

Technologies / Skills Used : *Entrepreneurship, Product Thinking, Client Onboarding, Team Leadership, Requirement Gathering, SEO, Business Operations*

PROJECTS

Full-Stack SEO Platform for a Local Art & Craft Store | | Website — 2026 - Present
Full-Stack web developer

- Built and launched a full-stack site for Pune's premier art and craft supplies store, achieving **$0 infrastructure cost** using Next.js, Cloudflare, and Supabase.
- Improved page load time from **~3.0s to ~1.8s** (**40% faster**) through image optimization, caching, and code-splitting, enhancing usability and search ranking.
- Designed an admin dashboard that allows the owner to enter SEO keywords, enabling automatic site updates with **0 code changes** or developer handoffs.
- Developed one-click indexing, allowing the generation of sitemaps and submission to Google, achieving reliability through iterative testing.
- Generated **10-20+ organic leads per month** with **$0 ad spend**.
- Authored the PRD, defined user stories, tested new features before release, and iterated based on the owner's feedback.

Technologies / Tools Used : *Next.js, Node.js, Supabase, Cloudflare, Google Search Console, SEO*

DiscoverIQ - Ecommerce Discovery Analytics [Ecommerce] | Github — Jan 2026 - Jun 2026
Ecommerce Analyst

- **Analyzed** 6.54M sessions, 3.09M users, 268K products, 726 brands, and 18 categories to assess performance.
- **Discovered** revenue decline from **$27.02M** to **$20.36M** despite an increase in sessions from **3.12M** to **3.42M**.
- **Identified** a conversion drop from **2.82%** to **2.05%** and a significant cart abandonment increase from **13.68%** to **67.73%**.

Technologies / Tools Used : *Python, SQL, Pandas, DuckDB, Power BI, Funnel Analysis*

Google Maps Lead Generation System | Github — Jan 2026 - Feb 2026
AI Automation Developer

- Developed an **AI-powered lead generation system** using **n8n** to extract business leads from Google Maps based on location, industry, or search query.
- Integrated Serper.dev, **Perplexity AI**, and **GPT-4o** to enhance business information, identify decision-makers, and generate qualified prospect lists.
- Created a **conversational AI interface** allowing users to search for businesses naturally and obtain structured business details for unlimited leads.
- Automated the lead discovery workflow, decreasing manual prospecting time by over **90%** and producing sales-ready datasets for outreach campaigns.

Technologies / Tools Used : *n8n, GPT-4o, Serper.dev, Perplexity AI, Google Maps, REST APIs, AI Automation*
